MARBLEFORM[®]

Innovation. Sustainability.

MarbleForm[®] is the sustainable, eco-friendly material that Claybrook has developed to reimagine the possibilities of stonecraft. The impact we have on the environment matters to us. That is why we have developed our patented moulded stone technology.

MarbleForm[®] is produced by using reclaimed stone leftover from the production of our tiles. This is then combined with hi-performance resin and color pigments. Using the latest injection moulding techniques we can form anything from classic bath and basin designs to custom pieces that were previously unimaginable. Emission-free and 100% recyclable, MarbleForm[®] demonstrates Claybrook's commitment to a sustainable and innovative future.
